Children have their own log on details in diary

Year 5 Science

Children need to show their understanding of our current topic of forces including, Magnets, Air resistance, Up thrust and Friction. They can create a poster, PowerPoint, booklet or model to show their understanding. The BBC website is a useful starting point for research.

<https://www.bbc.co.uk/bitesize/subjects/z2pfb9q>

Year 5 French

Use the links in the home learning document for revision or to learn some new vocabulary.

Try as many of the challenges as you can from the 'French Award' and 'French Challenge' documents.

Year 5 Technology

Art - Still Life

Using items from around the home such as flowers, fruit, vases and interesting objects create a Still Life composition that you can practice sketching in different ways. Use shade and tone at first, then develop your skills with coloured pencils. If you have pens, watercolours, paints or pastels at home try using different media to create your own works of Art. If you have access to a computer, look at Still Life pieces from other artists. Bring in all research and sketches and they will be added to your school project.

Computing across the whole school will be to complete activities from code.org
<https://code.org>

Those with a **Self Learn accounts** can go on from home.
